

AMAVERITAS

Energy: FAO 240

NEW

SEEDING
THE FUTURE
SINCE 1866

KWS

Top yields for biogas – rise to the challenge!

Characteristics / Quality

- Heavy yield potential (55 - 60 t/ha)
- Ideal for spreading harvest or drilling window on lighter land
 - Surpasses former generation hybrids eg; RONALDINIO, BARROS and CAROLINIO
- Rapid early vigour
- Recommended chop length: 7 – 9 mm
- Recommended seed rate: 42,000 seeds / acre (103,000 seeds / hectare)
- In low rainfall areas: 38,000 seeds / acre (94,000 seeds /hectare)

Data source: KWS Agroservice 2015 – 2016

“ AMAVERITAS is the No.1
in DM Yield over 2015 +
2016 in KWS' Northern
European trials network.
